The best thing to do now is finish reading this tutorial, and then if you want start snooping around in the source code, and looking at the automatically generated documentation. A further optional alphabet argument allowing you to specify the expected alphabet.

HenextappliedSprengel'smethodstoempiricalresearchonorchids.

The latter allows you for example to search PubMed or download GenBank records from within a Python script. One thing that I've tried to accomplish since coming back from my Fulbright is, I don't think we're going to go back to a time when we're all farmers and we're knowing everyone in our block. A motivating example is extracting a subset of a records from a large file where either Bio.
