Ostrich - The Flightless Bird! - Bali Safari Marine Park

The ostriches are a family, Struthionidae, of flightless birds. The two extant species of ostrich are the common ostrich and Somali ostrich, both in the genus.

Recent developments in ostrich farming

Though they cannot fly, ostriches are fleet, strong runners. They can sprint up to 43 miles an hour and run over distance at 31 miles an hour. They may use their.

Paleontologists Discover A Bird Three Times Larger Than An Ostrich

In one stride, an ostrich can cover up to 16 feet (meters)—about the length of a mid-size family car! The bird is speedy, too. It can run just over 40 miles (

Common ostrich - Wikipedia

The common ostrich (*Struthio camelus*), or simply ostrich, is a species of large flightless bird native to Africa. It is one of two extant species of ostriches, the only .

Ostrich | The Maryland Zoo

Ostrich facts: Learn about the ostrich, with facts about this big bird's characteristics, diet, habitat and behaviour, plus facts about ostrich eggs.

Ostrich | National Geographic

The Ostrich is a distinguishable, flightless bird that's not only one of the oldest birds on our planet, but also the largest in the world!.

Social behaviour of the South African ostrich *Struthio camelus australis*. Standing tall on long, bare legs, the Ostrich has a long, curving, predominantly white neck. Ostrich dominant or "alpha" hen mates with the territorial male, and they share the tasks of incubating Ostrich eggs and caring for the chicks. The bird is speedy. Males and females have different coloured feathers—male males may challenge a dominant male for access to his harem.
